

# BUYER'S GUIDE

## WHERE DO I START?

Buying a simple backyard shed is no longer a simple matter. The multitude of styles, colors, options, and upgrades make buying a shed (or a garage) almost as complicated as building a house. The choices are endless... How does one sort through everything and feel confident they made the right choices?

We're here to help. This booklet is more than a catalog. Rather, it's an informational buyer's guide for people who are looking to purchase a shed or garage for their home or business. We'll explain everything you need to know and help you answer questions that you never knew to ask. In the end, you'll be confident and ready to buy the shed that meets your needs perfectly in form, function and fitness.

## STORAGE IMAGINED

New sheds and the process of buying them can feel intimidating for customers who haven't gone through the experience before. That's why our easy 3D builder is the perfect way to start. Simply scan this QR code to begin customizing your project.

For ideas on where to start, you can page through this guide and find the building that matches your style.

# WHY CHOOSE A RABER PORTABLE STORAGE BARN?

**OUR MISSION**  
**to build the best sheds in the market,**  
**in the best working environment,**  
**improving our community**  
**one employee at a time.**

Raber Portable Storage has been providing quality storage structures to Indiana and the Midwest for nearly two decades. So, it's no surprise that we have the largest selection of sheds in all of Indiana. We invite you to visit one of our many locations to check out our quality products.

Here at Raber Portable Storage, your satisfaction is our top priority. We will work with you to solve your storage issues. All of our structures are handcrafted by experienced craftsmen who understand how important it is to have quality products. In fact, we stand by our excellent workmanship with a five-year warranty on our products.

Order a building at Raber Portable Storage Barns and you can rest assured that it will meet or exceed your expectations. We want to make sure that buying a shed from us is a pleasure, not a chore.

# HISTORY

We started building sheds full-time in January of 2000. However, that is only part of the story. I have been helping build barns since I was 8 years old, as my father built barns as a part-time job. Man, those were some late nights! We didn't have any fancy shop or power tools. At that time, the only tools we had were a gas-powered Homelite skill saw that ran sometimes, and a gas-powered table saw.

Back when our company began manufacturing sheds in 2000, I only had one employee, my wife. I didn't have much experience talking to people at the time, so that made it tough. I still remember the first shed I sold to a man in Indianapolis. He had more faith in me than I did!

Our business has grown a lot since then. We now have a full staff of full and part time employees plus our delivery and setup team. Thank you to all of our past and future customers for helping us grow and evolve our business into what it is today. We are excited about the future and we are committed to staying focused on helping one customer at a time with their storage needs.

*Marvin Raber*

*OUR MAIN FACILITY, MONTGOMERY, IN*

# BUILT TO LAST

We strive to build each of our sheds with attention to detail in every level. As each member of our team works to construct your building, we take the time to compare the completed work against our quality control checklist. As the shed comes off the line, we're confident in our workmanship and give each shed an industry leading 5-year warranty against any defects in construction or materials.

Almost all of our buildings are available in your choice of exterior siding: metal, vinyl, or painted LP Smart siding.

Use this chart to help determine what size of building will work best for you!

Size (Sq. Feet)	Storage Use	Recommended Size
96-192	<ul style="list-style-type: none"> <li>Garden Tools</li> <li>Push/Riding Mower</li> <li>Tiller</li> <li>Boxed Items</li> </ul>	<ul style="list-style-type: none"> <li>8x12</li> <li>10x12</li> <li>10x16</li> <li>12x16</li> </ul>

# DELIVERY

At Raber Portable Storage Barns, our standard delivery range is up to 250 miles from our main location in Montgomery, Indiana. Our primary service area covers Indiana, but if you are outside of our standard delivery range (Ohio, Kentucky, Illinois, or further), we can make arrangements for you to receive your structure.

Our delivery process is designed to be minimally disruptive and simple for you as the customer. We simply ask for your help in checking a few details which are outlined in the Delivery Checklist to the right.

## HOW IT WORKS

Our delivery professionals will contact you during the week prior to delivery in order confirm the date and schedule a time to drop off your structure. We will also call you an hour prior to arrival to let you know we're on our way.

After we arrive, we start by unloading your structure on the street or in your driveway. Then we place the transport mule at one end of the structure and put flotation tires under the other end. Last, we drive the structure across your yard and place it into your prepared plot.

Using this system allows for minimal disruption to your yard and landscaping since we almost never need to get the truck and trailer in your yard.

## CONTACT US

If you have any additional questions, please feel free to call your local dealer and we'll be happy to answer your questions.

## DELIVERY CHECKLIST

### ■ CLEARANCE

We need clearance that is 2' more than the width of the shed. For example, if you order a 10'×16' shed, our delivery team will need a 12' wide opening to get the shed through.

### ■ LANDSCAPING

Check for overhead limbs or wires along the path between the street and final location. Try to make sure that we can get through and that the space is clear. Please trim trees if necessary and otherwise remove obstacles along the path.

### ■ PREPARE THE PLOT

Whether or not you decide to install a gravel pad, the area below your building should be relatively level before our delivery team arrives. This can be checked by running a string the length of the area, then hold a level on the string.

If the pad is more than 8° off level, we encourage you to take the time to get it closer to level. You can use crushed stone or move the dirt using a skid loader or tractor with a scoop.

We can provide concrete blocks if needed and can level it for you for a minor fee. Failure to take the time to level your structure will often make it less appealing cosmetically.

# RENT-TO-OWN

There are a number of reasons why someone may choose to rent-to-own a shed.

## 1. PRACTICAL STORAGE SOLUTION

Rent-to-own is a popular option for people who are remodeling or moving and need some extra storage space. Rent-to-own buildings are a great choice because they're generally less expensive than a POD. Rent-to-own sheds are also an excellent upgrade for people who are currently renting a storage unit. Why drive to your storage unit when you could have one right in your backyard?

## 2. BUDGET FRIENDLY

For some people, the idea of buying a shed outright can be impractical. This is why rent-to-own is such a popular option among homeowners. Rent-to-own programs are flexible and can fit within just about any budget.

Get pre-approved for rent-to-own today!

## 3. NO LONG TERM OBLIGATION

Rent-to-own sheds are also commitment-free, meaning that you can return the shed if you determine that you can't afford it, or don't need it after all. There's no obligation to buy! However, after paying off the balance on your contract, the shed is yours.

## 4. NO CREDIT CHECKS

One of the greatest perks of rent-to-own sheds is that there are no credit checks involved. In fact, rent-to-owning a shed won't have any impact on your credit score because it's a rental program, not a loan.

## HOW IT WORKS

When it comes to renting-to-own a shed, all we need is your first monthly payment and a security deposit.

Once the shed is delivered you will receive a payment coupon book, and your first payment will be due in 30 days. Making payments is easy and convenient! Pay online, by mail, by phone, or we can arrange to have payment automatically withdrawn from your account each month via ACH or credit card. We offer 24-month, 36-month and 48-month agreement options.

Get approved today!

# SINGLE CAR GARAGES

Available With  
**PAINTED  
SMART SIDING  
or  
VINYL SIDING**

FLOOR DETAIL

# INSULATION

Our high quality spray foam insulation is offered in high and low density applications to best suit your unique environment and weather patterns.

When using spray foam insulation, you can count on an excellent vapor and moisture barrier to protect your wooden or metal outdoor building through every season. It also fills in cracks and irregular surfaces where air leaks often occur. Proper insulation guarantees that you have control over air flow and allows you to cool and heat your unit as you see fit.

When you choose Raber's insulation products, you are automatically investing in extending the life of your structure's flooring. You can count on our products to protect surfaces such as concrete, wood, or vinyl, while also safeguarding against wildlife or vermin who may want to move in.

Scan to visit  
our website  
and view  
pricing.

# ELECTRICAL

Raber's electrical packages are a safe, convenient way to install electricity in your outdoor building.

Each of Raber's electrical packages comes equipped with:

- 1 - 6-pole 100-amp breaker box (200-amp breaker box available)
- 12-14 - electric outlets (location customization available)
- 2-3 - light sockets per switch

We proudly offer outdoor breaker boxes that are ideal for use in both commercial or residential outdoor buildings, and are compatible for use with most standard circuit breaker models. Each breaker box features a waterproof rain cover, along with high-quality aluminum to ensure your electrical system functions properly throughout the year.

For enhanced safety in outdoor environments, you can rely on the ground-fault circuit interrupters to secure your property and electrical system against ground faults or "leaks". Similar to any other outdoor-based electrical system, you should always be sure that any product you choose complies with the National Electrical Code, which recommends the use of ground fault interrupters (GFCIs) to make sure that your outdoor building applications run smoothly.

For your convenience, each purchase of an electrical system from Raber is delivered so you can enjoy a ready-to-use system that will be prepared for your electrician to connect and turn on as soon as installation is complete. You can also count on us to locate and provide service from a certified and properly licensed electrician, which saves you time, money, and hassle. We will take care of making sure that each part and product is securely fastened within the electrical system before our professionals leave the premises.

We also offer a wide selection of interior and exterior lighting fixtures.
